

It's time to lead the global market flow.

IVS **INDUSTRIAL VALVE SUMMIT**

INTERNATIONAL EXHIBITION AND CONFERENCE ON VALVE AND FLOW CONTROL TECHNOLOGIES
27-28 MAY 2015, BERGAMO EXHIBITION CENTRE

ORGANISED BY

**ENTE FIERA
PROMOBERG**

IN COLLABORATION WITH

www.industrialvalvesummit.com

WELCOME ADDRESS.

Dear Colleagues,

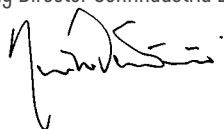

it gives me great pleasure to write this forward to the Industrial Valve Summit 2015 preliminary event guide and in doing so, extend a warm invitation to you to join us in Bergamo this May for this important biennial valve industry gathering. Industrial Valve Summit turns up successfully to attract many industry professionals, adding to the rich diversity of attendees to the show. This year we are fully expecting attendees from over 100 different countries from around the world. This is the first occasion that Industrial Valve Summit to be held in Bergamo. With undergoing such a radical change in the structure of energy sector, it feels like we are ideally located to engage in this crucial debate for the valve industry, Bergamo has a charm and warmth that will ensure that your visit to this historic city a real pleasure. The last week in May will see Bergamo hosting Industrial Valve Summit and bringing the largest collection of valve and flow control technology and solutions providers gathered in Europe. The exhibition will feature solutions serving the entire spectrum of the valve industry. The theme of this year's event of "Innovation in the valve industry: the challenge for a sustainable technology" reflects the challenge that this unprecedented era of change within the energy sector is presenting our industry. If ever there was need for the industry to collaborate and exchange views about how best to adapt to these new market conditions and to develop an influential voice in the debate, it is now. Whether you are in the forefront of the valve industry, there is a mutuality of interest as to just how a sensible and viable integration takes place. As a result, both the strategic aspects and the technology solutions of integration, feature high on the conference programmes in Bergamo. Whether your focus is on the valve market, Industrial Valve Summit will bring you face-to-face with those with the ideas, solutions and technologies to help you develop your business. This Preliminary event guide contains the Industrial Valve Summit event programme along with the "at a glance" conference grids. All sessions are open to registered delegates for the event. Any additions or amendments to the programme will be reflected on the website:

www.industrialvalvesummit.com

You will also find details of the many other features of the Industrial Valve Summit experience, plus of course the extensive list of the exhibitors whose technologies and services you will encounter in Bergamo. You can find out all the ways to register to attend Industrial Valve Summit either as a visitor or delegate including details of the early Bird discounts on offer. When change is happening, we have the choice to either watch from the side-lines or decide to get involved and influence the direction. make your mark, by choosing to join us in Bergamo for Industrial Valve Summit. We look forward to seeing you in Bergamo.

GUIDO VENTURINI

Managing Director Confindustria Bergamo

ALL THE SOLUTIONS IN ONE PLACE.

ATTENDING IVS – Industrial Valves Summit gives you the opportunity to share knowledge, experience and ideas with other leading industry professionals and organisations.

IVS – INDUSTRIAL VALVES SUMMIT IS THE:

- Forum for the industrial valves industry
- Innovations platform and technology summit
- Trendsetting meeting point
- Take-off for investment decisions
- International network of experts and specialists.

ADVANCED VALVE TECHNOLOGIES. The constant progress of technological innovation is a feature of the manufacturing process in industrial companies, and the critical nature of the investments associated with their introduction. This means that managers must constantly strive to keep up to date.

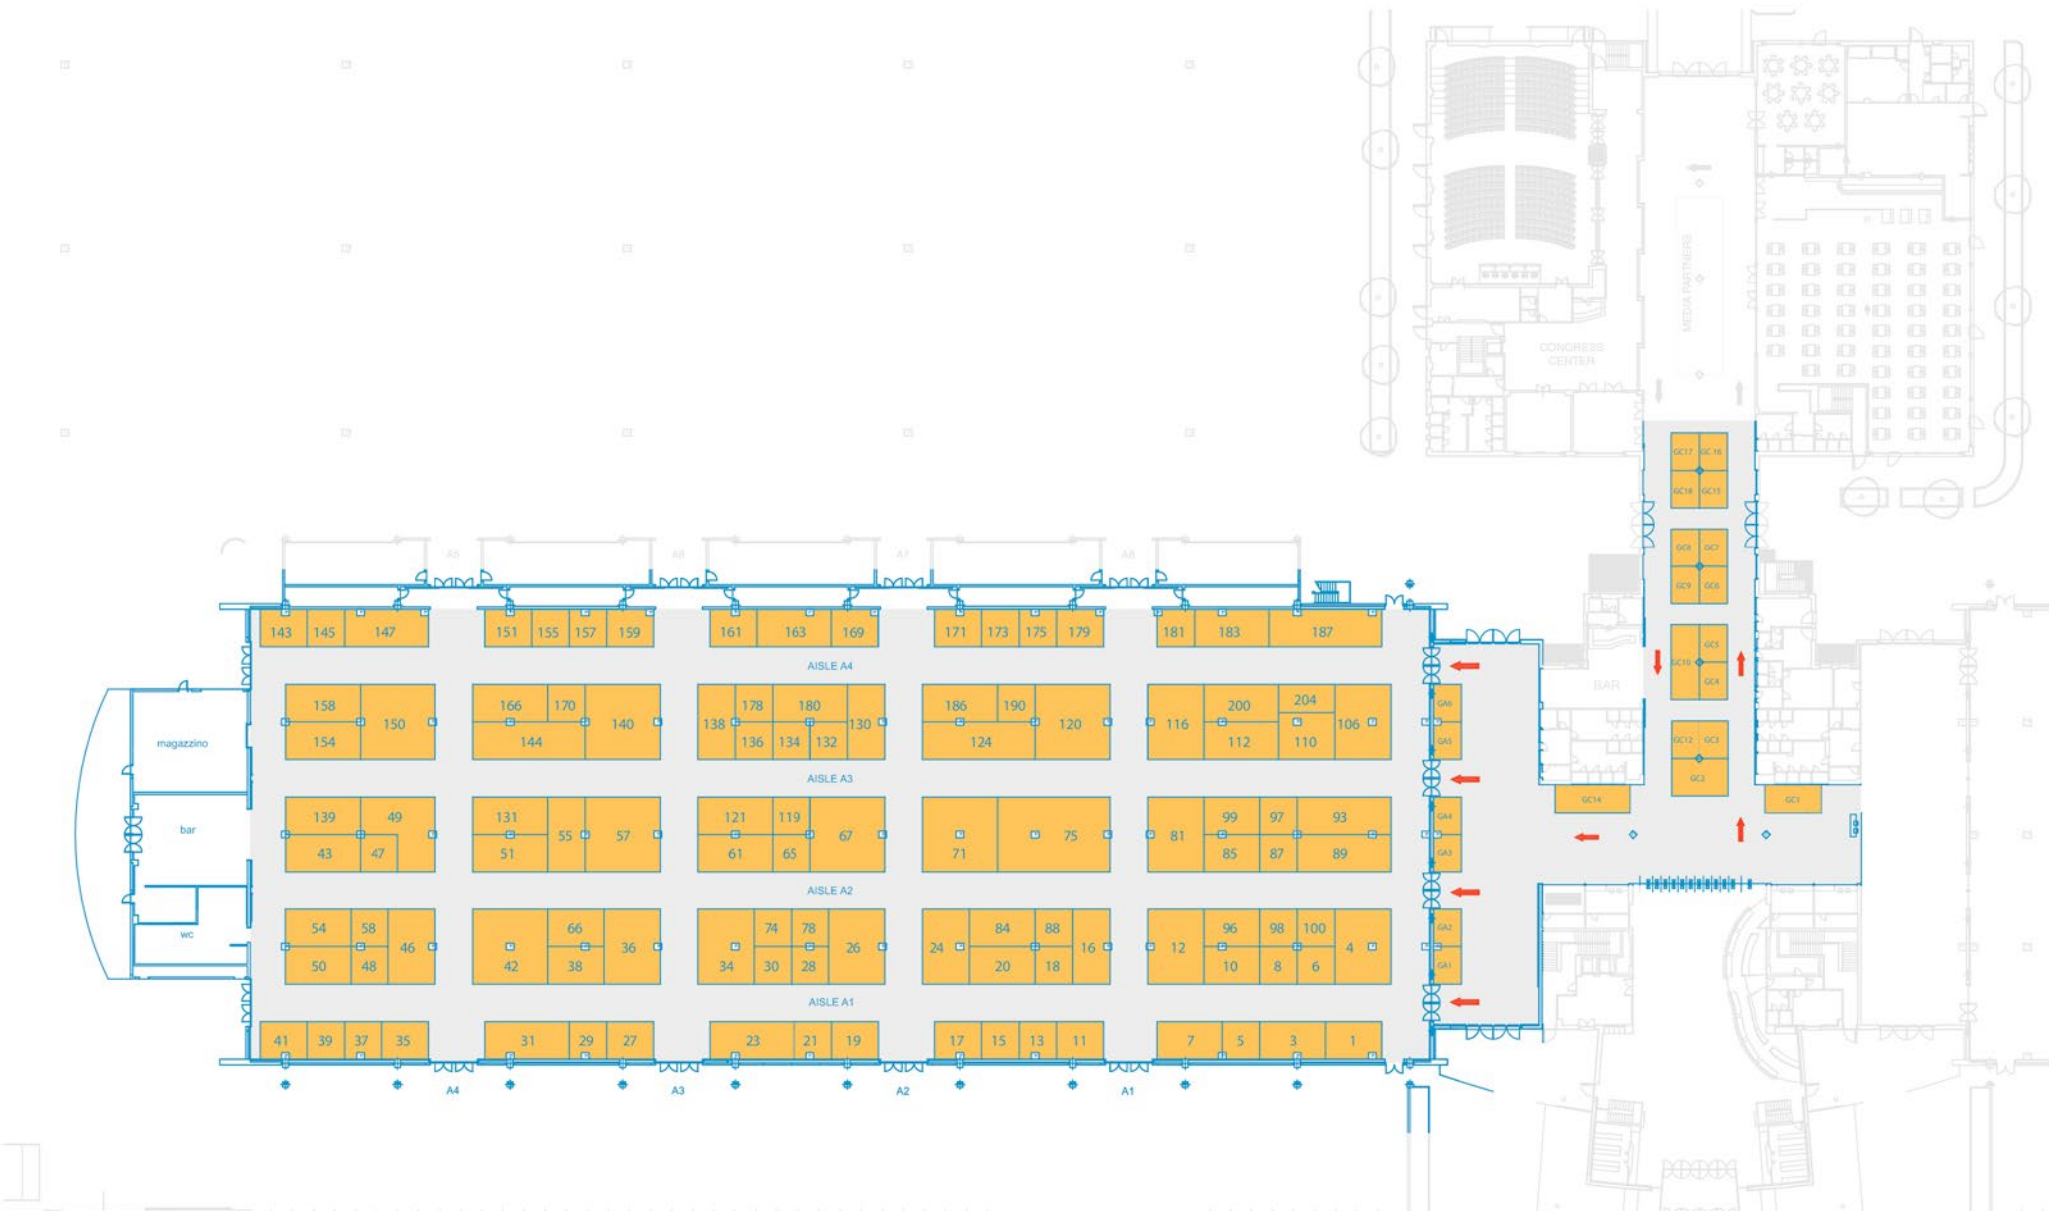

CORE TECHNOLOGIES. The combination of exhibitors, demonstrations and conferences at IVS 2015 offers engineers, company officials, managers and professionals engaged in designing, engineering, constructing, managing, operating and maintaining industrial plants the chance to build up an interdisciplinary picture of the various valve technologies and flow control solutions and to compare the products offered by the different suppliers.

ADVISORY BOARD.

INDUSTRIAL VALVE SUMMIT's independent expert Advisory Board is responsible for setting the conference themes and suggested topics, and for selecting papers to be included in the programme. The Board represents a wide cross section of the industry, and comprises experienced professionals from leading end user, engineering and construction companies, service providers, associations and consultancies.

CHAIRMAN:

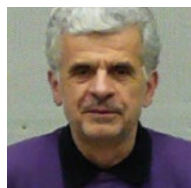

Maurizio Brancaleoni,
ANIMA Confindustria

MEMBERS:

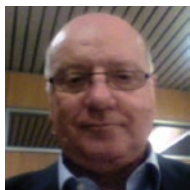

Bader M. Al-Jarallah,
Saudi Aramco

Evaldo Bartaloni,
Clui Exera

Aldo Bonomi,
Confindustria

Roberto Cerliani,
NACE International – The Corrosion Society

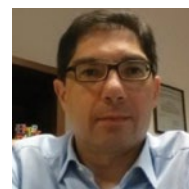

Marco Fortis,
Fondazione Edison

David Edwin-Scott,
ESA – European Sealing Association

Brian A. Lade,
Syncrude Canada

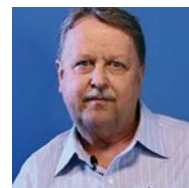

Alberto Leni,
Saipem

Carlo Mapelli,
AIM – Associazione Italiana di Metallurgia

Robert McIlvaine,
McIlvaine Company

Ron Merrick,
Fluor Corporation

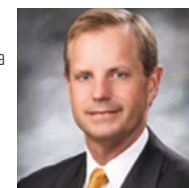

Umberto Navarra,
Technip

Alexandre Popa,
ISO – International Organization for Standardization

Jean-Michel Rivereau,
Total Exploration & Production

John Royall,
Gulf Publishing

Pascal Vinzio,
CEN – European Committee for Standardization

Piergiuseppe Zani,
ISA – International Society of Automation

THEMES AND TOPICS.

THEME 1: ADVANCES IN VALVE DESIGN, SAFETY, MATERIALS AND COATINGS

These sessions will present recent developments in materials and surface protection technologies, emphasizing scientific principles of improvements in corrosion protection and assessment of antifouling and wear-resistant coating systems.

THEME 2: ACTUATION, CONTROL AND COMMUNICATION

Valve actuation and control technologies have witnessed, in the last two decades, a radical evolution in both design and production methodologies.

This track will cover the current state-of-the-art which, thanks to the extensive use of digital technologies, has led to the introduction of new and revolutionary communication and sensors' techniques in process plant management and predictive maintenance.

THEME 3: VALVE SEALING PERFORMANCE

Process plant managers have a host of good reasons to minimize fugitive emissions from their facilities and reduce the amount of process fluid released into the atmosphere and surrounding environment. Those reasons include keeping employees and neighbours safe, lessening the facility's environmental impact, complying with increasingly stringent air-quality regulations, optimizing the plant's energy consumption and maximizing plant operating efficiency. In inviting papers, we would like prospective authors to consider today's monitoring technologies, stem sealing techniques, packing designs and other advances can be powerful tools in optimising valve sealing performance, including applicable international standards for test and inspection.

THEME 4: STANDARDS AND QUALIFICATIONS

Speakers are invited to address how today's valve standards are dynamic documents that reflect sound engineering practice, changes in market demands and changes in technology and manufacturing procedures.

THEME 5: BUSINESS AND MANAGEMENT

Speakers are welcome from within and outside the industrial valve sector who have insights to share or opinions to voice concerning any aspect of the strategic, business growth, market trends and forecasts of today's fast changing valve industry.

MARK YOUR CALENDAR.

DAY	THEME	H.	SESSION NR.	TITLE
WED 27TH		10:00	1	Control valves and position sensors
		10:00	2	Sealing materials
		10:00	3	Standards
		10:00	Round Table	Mergers and Acquisitions in the Valve Industry
		14:00	4	Valve Design
		14:00	5	SIL, monitoring and diagnostics
		14:00	6	Fugitive emissions and new trends in stem packing design
DAY	THEME	H.	SESSION NR.	TITLE
THU 28TH		10:00	1	Valve Design
		10:00	2	Communication, safety instrumented systems and Hipps valves
		10:00	3	Fugitive emissions and new trends in steam packing design
		10:00	Round Table	Global Sourcing in the changing energy industry
		14:00	4	Coatings and Materials
		14:00	5	Testings procedures and testing devices
		14:00	6	Standards

CONFERENCE REGISTRATION.

Conference participation implies registration fees. All conference attendees are requested to register and to pay the registration fees in full before the event or onsite at the conference registration desk. Visit the website for any other information.

GUIDED TOURS AND ACCOMODATION.

BERGAMO: TWO TOWNS IN ONE

With more than 115 thousand citizens, the city of Bergamo is the fourth largest municipality in Lombardy by population and is divided into two distinct parts: the Upper Town (Città Alta), with its charming old town surrounded by 17th-century cyclopic defensive walls, and the Lower Town (Città Bassa), modern and highly urbanized but still characterized by exceptional historic districts. The two parts of the town are connected by funicular/cable car, roads, and foot-paths.

THE CHARM OF A CITY-FORTRESS

From a geographical point of view, Bergamo is placed on the foot of the mountain and hilly territory of the Orobie Alps, midway between the Brembo and Serio rivers: the old town is set on a system of hills which is nothing but the extreme offshoot of Orobie Alps, before the plain. Bergamo is not only famous with the nickname of Città dei Mille, as it is the one which contributed to Garibaldi's expedition with a very high number of people belonging to every social class, but also for being one of the 27 Meritorious Cities of the Italian Risorgimento; for its University of Science, Arts and Letters and the Accademia Carrara, but also for its hyper-technologic pole Kilometro Rosso: between tradition and innovation, the city-fortress smoothly moves towards a future as bright and multifaceted as its ancient past.

27 MAY - BERGAMO: DISCOVER ONE OF THE MOST IMPORTANT ART CITIES IN LOMBARDY

At 9.00 meeting with English speaking guide at Funicular in the upper city. A 3-hours guide visit of Città Alta and its millenarian story. The tour will include stops by Piazza Vecchia (Old Square), the Town Hall, the Dom's square, the Dom dedicated to St. Alexander, the Basilica of Santa Maria Maggiore, Colleoni's Chapel and funerary monument and the Baptistry; the birthplace, grave and museum of Gaetano Donizetti, the fortress and the castle of San Virgilio, the Accademia Carrara or the Exhibition of Palma il Vecchio.

28 MAY - VALCALEPIO AND ISEO LAKE: TASTE AND LANDSCAPE

At 9h30 meeting with participants at Urban Center Viale Papa Giovanni XXIII, 57. Departure for Valcalepio, by private bus. Guided tour to Acetaia, winery and vinery (2 hours). Guests will be accompanied in a cultural route in the canteen, where they will be involved in the discover of the vinification and sparkling techniques. The tour will also include a visit to the S. Stefano historical village, a wine degustation offered by the Testa family, a tour of Iseo and Monteisola.

Both tours can also be re-booked for May 29, 30 and 31.

To receive information and favourable rates about overnight stays in hotels and transfers please contact:

AVAILABLE SERVICES:

- Travel: informations about all means of transport, ticket reservations, car service with driver;
- Accommodate: reservations of facilities of all categories (hotels, bed & breakfast)
- Special offers: before, during and after the exhibition are organized holiday packages, wine and food tours, cultural, wellness and shopping packages. It is also possible make reservations for shows and cultural events and book in typical restaurants or in the trendiest clubs of the city;
- Management Groups
