## The Vision

To be the **Platform** enabling **Augmented Workers** in Manufacturing

## The Challenge

Research shows that **cost of poor quality** at point of manufacturing is between **5%-40%** of their generated revenue

## Pain Points

### The Pain Points that contribute to Cost of Poor Quality

Complex Products/  
Processes

Skills Gap

Sense Making

## The Solution

**KIT-AR** is a **B2B software platform** that **digitally augments** manufacturing workers to:

Access the right  
knowledge at the  
right time

Reduce mistakes  
and increase quality  
with traceability

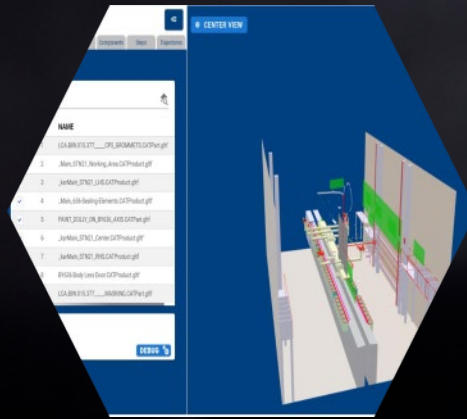

Collect insights and  
continuously  
improve work  
processes

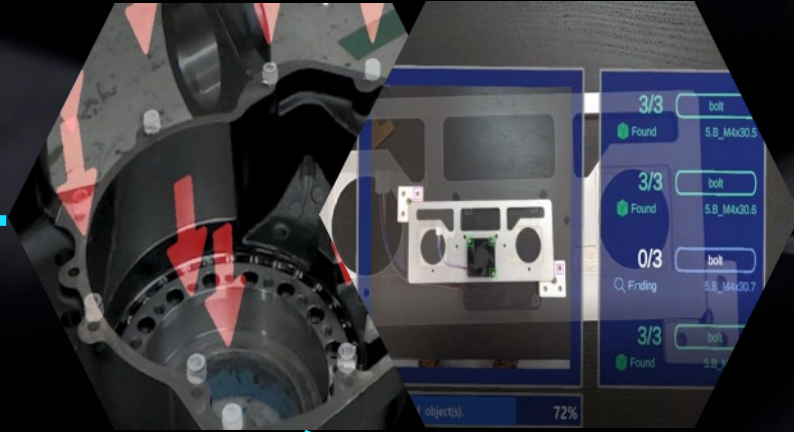

# The Product

KIT-BUILD

Capture **knowledge**  
in instruction sets

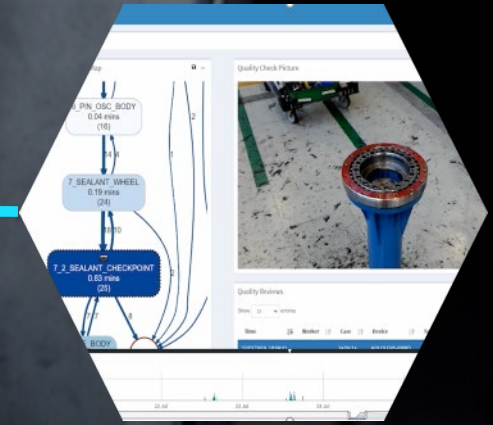

KIT-ASSIST

KIT-SMART

Deliver **knowledge**  
tailored to the  
needs of the  
worker

Verify correct  
application of  
**knowledge**

KIT-INSIGHT

Extract **knowledge**  
to support decision  
making

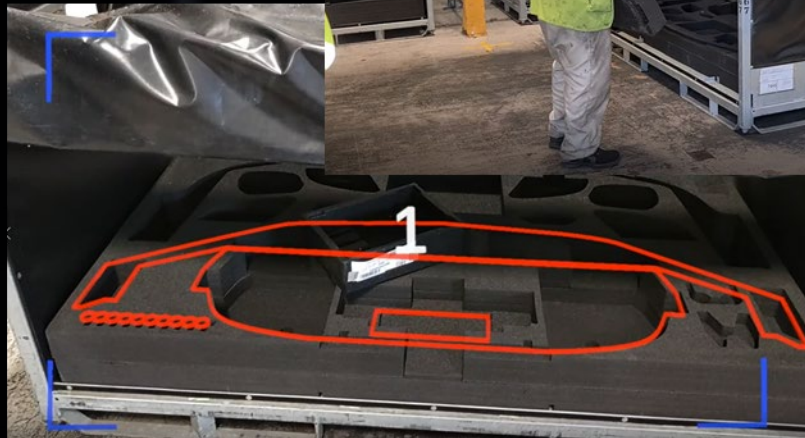

# Use Case KIT Assembly

STEP 1 of 18

Part Info	Qty	Disambig	Verify	Error
HANDLE OUTER DOOR HANDLE LH/RH	x4		✓	
LOCK CAP RIGHT DVR	x1		✓	
LOCK CAP RIGHT PAS	x1			
LOCK CAP LEFT PASS	x2			✗

## Automotive Sector

### Need:

Worker to follow recommended good practice the assembly of small part KITS to minimise the errors and support quality traceability

### Result:

Improved productivity (20% increase);  
Reduction of Errors; quality traceability.
