More *Data*
Easier *Analytics*
Accessible *A.I.*

*for factories and facilities
(as it happens in our everyday life)*

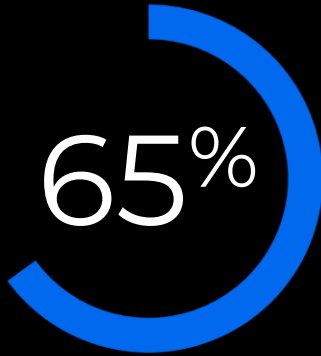

QUICK ALGORITHM

The Problem

When it comes to *physical assets* too much is left to *intuition, experience, pen and paper*

of information in a plant
is ***not digitised***

Too little is
Data-Driven

of companies can't execute

easily*

Data-Ecosystem

Integrations with industrial
solutions, IoT and
Hardware

AI and ML

A.I. driven alerts,
recommendations &
automation

Asset Augmentation

Enhance assets with digital
content

Human Activity Tracking

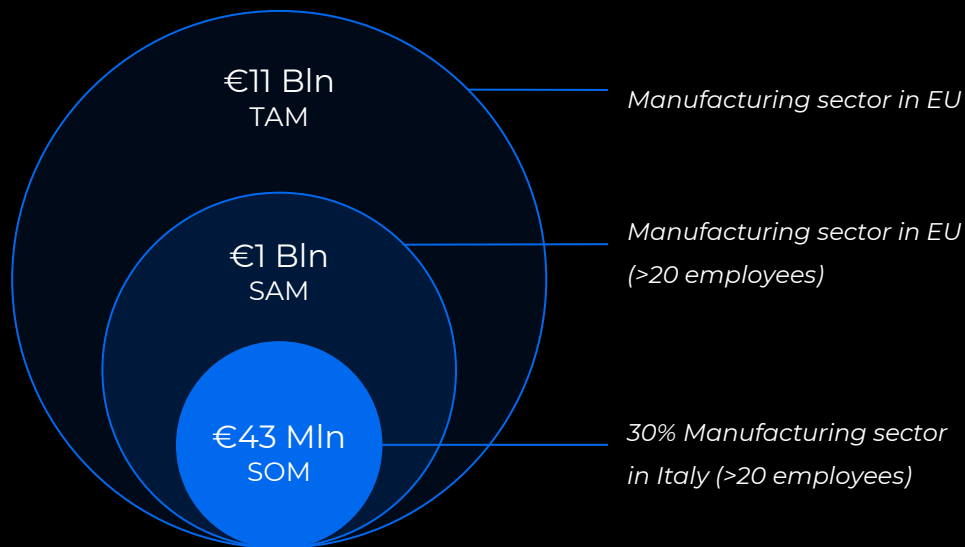

Sensor data are augmented with
human activity data collection to
improve algorithms' precision
