01

PROBLEM

We describe the problem we encountered

01

PROBLEMS

IoT Sensors

Heterogeneous and with
different protocols

Business Assets

Heterogeneous and hard to
connect

Process Automation

Organized on a time basis
rather than on events
(data) and monitoring

Expertise & Skills

Difficult to transfer
between people

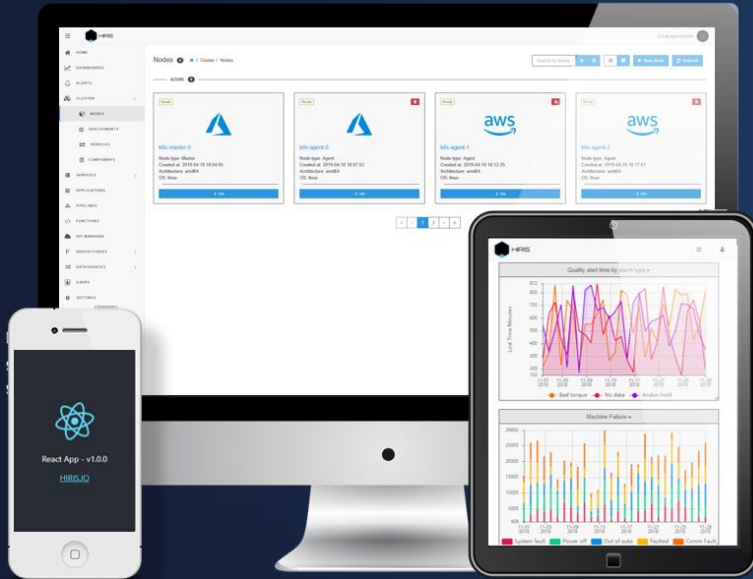

02

SOLUTION

The solution we have developed

02 SOLUTION

One solution to:

- 1 CONNECT DATA SOURCES
- 2 GET DATA ANALYTICS
- 3 ADD INTELLIGENCE
- 4 MANAGE RESOURCES THROUGH UI

HIRIS.IO comes with a responsive web interface to easily manage and control heterogeneous data assets providing battle tested tools for Data Analytics, DevOps Automation and Intelligence.

04

BUSINESS MODEL

How we monetize our product

04

BUSINESS MODEL

SMALL MEDIUM BUSINESS

Shared and managed environment
on public cloud

Pricing model:

- ✓ Recurring payments based on number of users and resource usage

ENTERPRISE

Private platform deployed on target
environment

Pricing model:

- ✓ Installation fee (una tantum)
- ✓ Standard use license (recurring or perpetual based)
- ✓ Support plan (recurring starting: 5 users and 6 VMs)

COMPETITORS

06

ADDED VALUES

Our peculiarities

06

ADDED VALUES

- ✓ Single solution for multiple data sources
- ✓ Unified data model
- ✓ No Cloud Provider Lock in
- ✓ Internal Alerting system
- ✓ Less development and maintenance time
- ✓ Less IT skills and time needed due the convergence of infrastructures and technologies, maximization of savings
- ✓ Integrated Application monitoring tools (AMS) , down-time reduction and SLA maximization
- ✓ Increased security by maintaining data on private systems (also offline), without renouncing the redundancy of clouds
