

Polymers

P L A S T I C I S
E S S E N T I A L
F O R O U R
L I F E B U T ...

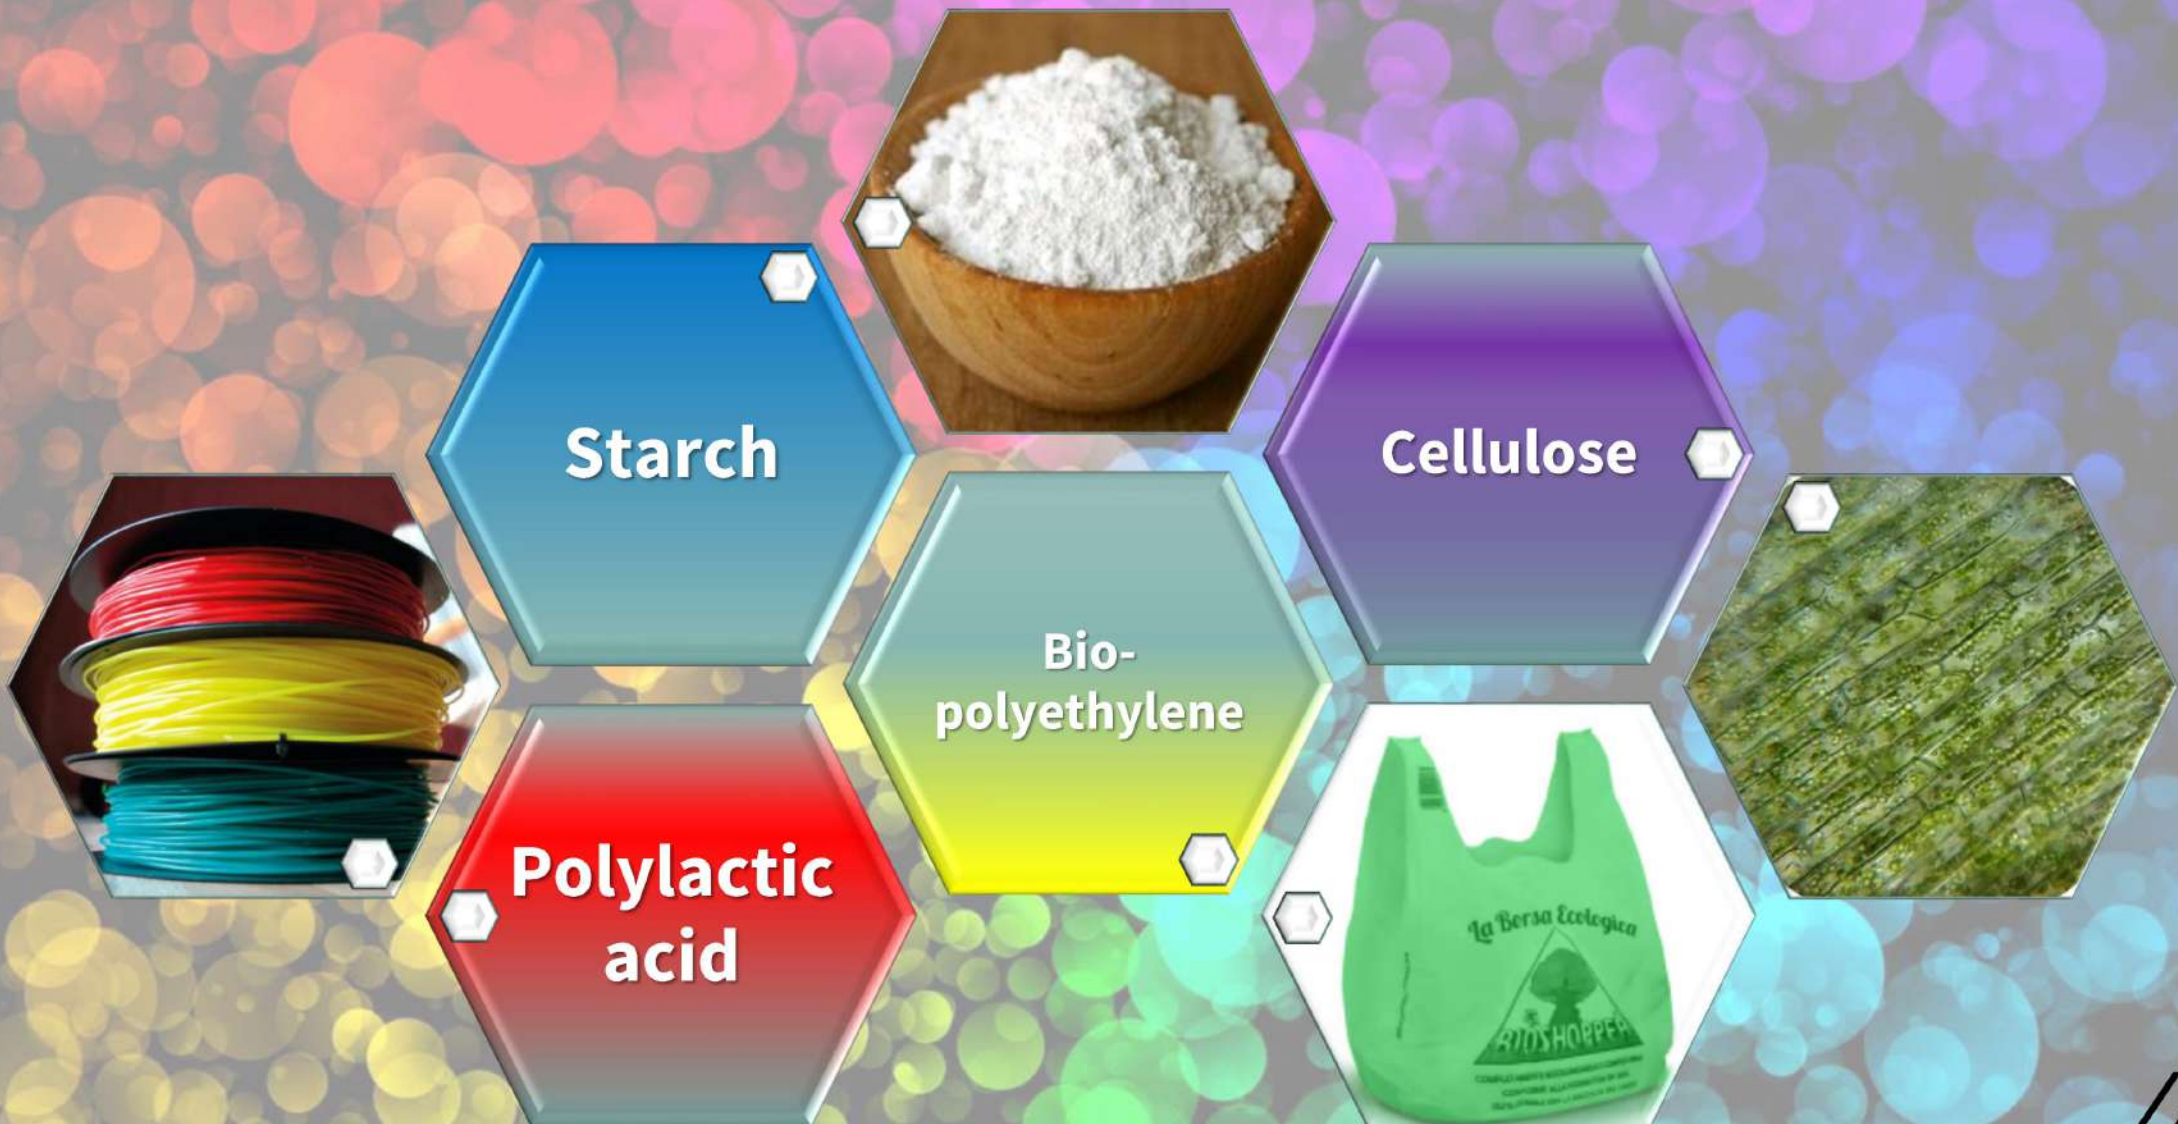

THE INCREASE
IN WASTE HAS
CAUSED
PROBLEMS FOR
THE
ENVIRONMENT
AND FOR OUR
LIVES.

**THE
BIODEGRADABLE
MATERIALS
COULD BE THE
SOLUTION TO
THE PROBLEM.**

TRY TO USE
WASTE
MATERIALS TO
PRODUCE
BIOPOLYMERS
(BAGS,
PACKAGING,
E C T .)

Starch

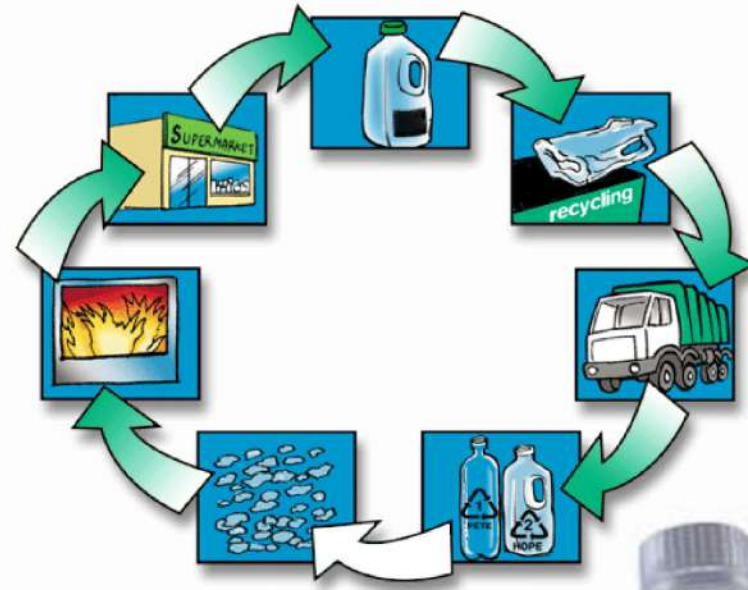

Cellulose

**Bio-
polyethylene**

**Polylactic
acid**

IT'S
IMPORTANT
THAT
POLYMERS
HAVE LONG
LIFE AND
STRONG
RESISTANCE.

MY IDEA IS TO
CREATE A
BOTTLE MADE
OF POTATO
STARCH.

A BOTTLE THAT
CAN
DECOMPOSE.

**WE MUST
HAVE
RESPECT
FOR OUR
WORLD.**

THANKS FOR YOUR ATTENTION
